

FOSS involvement

Last Updated mardi, 10 février 2009

Because Free and Open-Source Softwares (FOSS) is the basis of our business, Dipole Consulting is involved in a number of FOSS initiatives.

At the moment, we are contributing to :

- Thuban : Didrik Pinte is contributing to the development of an Interactive Geographic Data Viewer
<http://thuban.intevation.org/>
- HydroPlatform : Dipole Consulting has been contracted to develop this software based on Thuban under a GPL licence
- Debian : by proposing patches and bug reports to the Debian Bug Tracking System.

- Being active on the some FOSS4G mailing-lists and reporting bugs and patches to upstream BTS
