

JOB : Developer position

Last Updated mercredi, 04 mars 2009

Dipole Consulting is looking for a new resource to enlarge its development team. The candidate would first concentrate on support and maintenance of existing projects (Python and PHP softwares). He will work in a fully open-source environment working on web and desktop applications focusing on environmental data management. This is more than a developer position. Dipole Consulting is a small company. The candidate will surely do some project management, have contact with the client, prospection of new projects, etc.
