

## JWaveLib for eWON

The JWaveLib for eWON product is a integrated version of the JWaveLib into ACTL eWON routers.

It provides full access to Coronis network within eWON's by combining the easiness of the JWaveLib to the complete SDK of the eWON architecture.

This product is available in two version :

- a full featured application for simple data retrieval (fixed daily frequency and ftp upload)
- a SDK version allowing the user to build a custom application
